DAL SIN LINE®

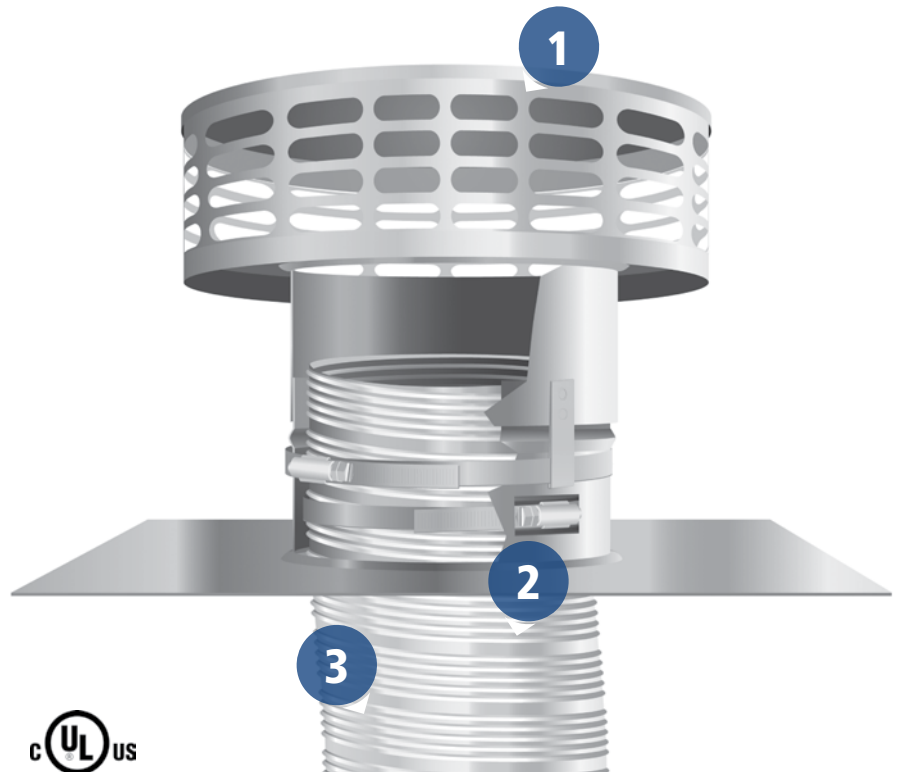

# Aluminum Flex Venting

"Dalsin Line"® aluminum flexible liners are used for venting category 1 and direct vent appliances. Manufactured using Type 3003 aluminum, this heavy 2-ply liner is made from .005" thick, high grade aluminum for a total thickness of .010".

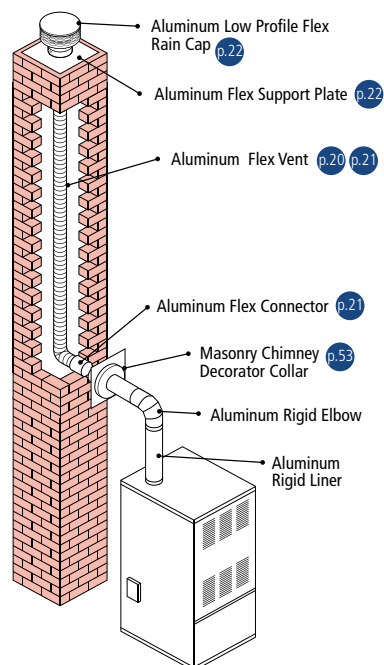

## Key Features

- 1** Type 3003 (.030") thickness Aluminum components
- 2** 2-ply, Type 3003 (.010") thickness
- 3** Durable Interlock flexible liner for superior strength

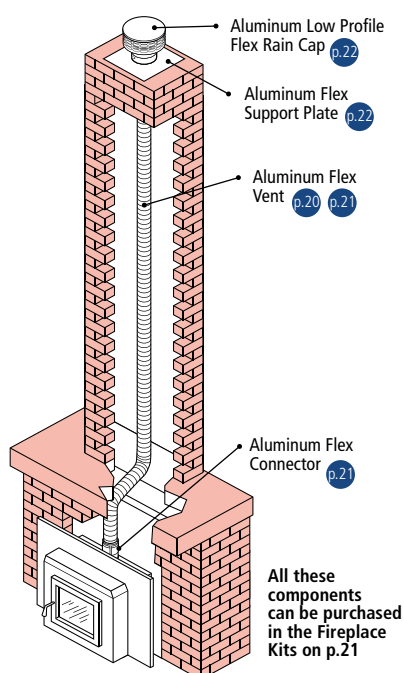

# Applications

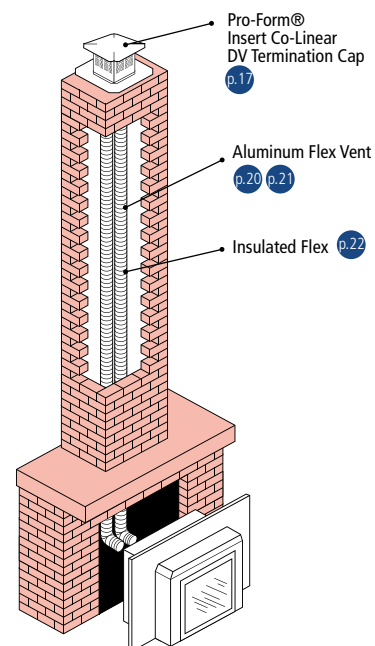

## Gas Appliance Venting Into Masonry Chimney

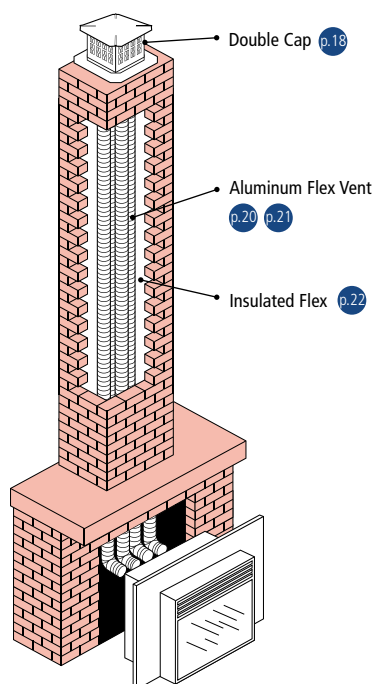

## B-Vent Gas Insert

## Direct Vent Gas Insert

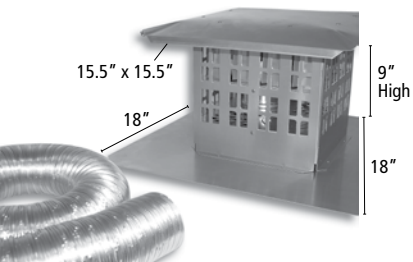

## Back-to-back Application with Double Cap

# Aluminum Flex Venting

**DALSIN LINE®**

## Light Stainless Flexible Liner

"Dalsin Line"® light flexible liner is listed for chimney relining and is suitable for wood, pellet, gas, oil, and coal applications. This liner is manufactured using .005" thick Type 316L stainless steel and backed by a limited lifetime warranty. All components are made from Type 316L stainless steel and are designed for quick and easy installation.

### Key Features

#### Professional Grade Materials Provide Ultimate in Safety and Performance for a Lifetime

- All flex system components are made from 24 gauge, type 316L Stainless Steel
- Entire flex system is warrantied for life
- U.L. and U.L.C. Listed to UL1777 standards for chimney liner

#### 1 Low-Profile Termination Provides Low Visibility But High Performance

- A stamped design provides finished appearance
- Many other termination styles available

#### 2 Ultimate Liner Construction Provides Lifetime Durability and Safety

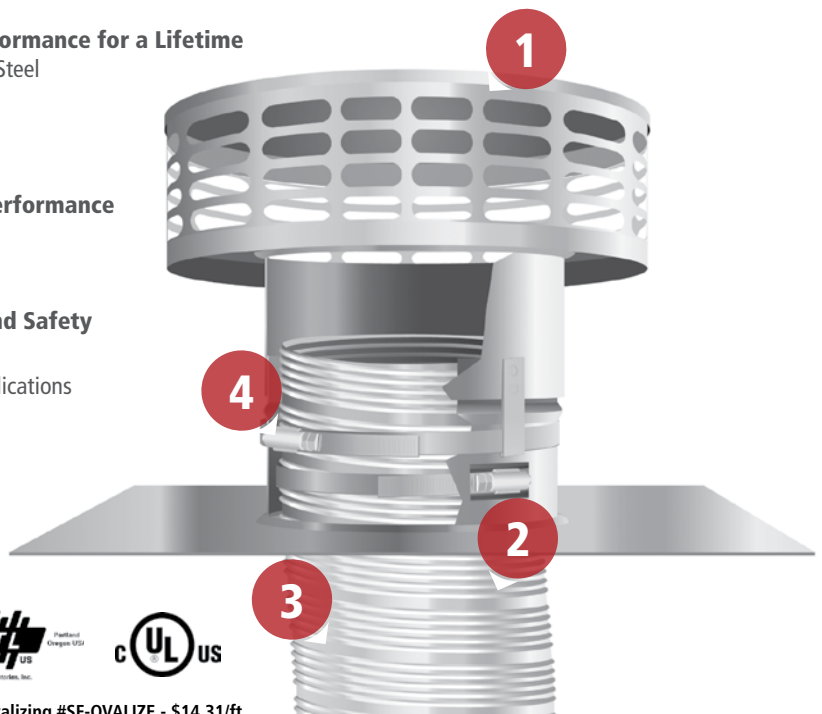

- Made with .005" thick, type 316L stainless steel
- Professional grade materials make liner ideal for multiple liner applications

#### 3 New and Improved Strongest Liner on the Market

- Made with the thickest materials in the "light" flex category
- More flexible
- Stronger lock for durability

#### 4 Fast, Fastener-Free Installation

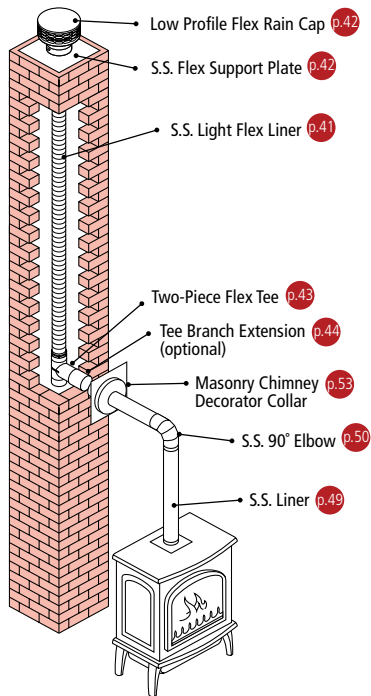

- All components have factory integrated stainless steel hose clamps for safe and strong connections
- No tools or fasteners needed for installation

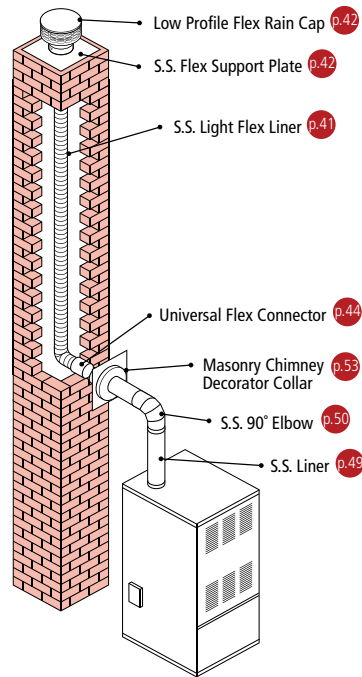

Custom Ovalizing #SF-OVALIZE - \$14.31/ft.

# DALSIN LINE®

## 24 Ga Stainless Rigid Liner & Fittings

"Dalsin Line"® rigid stainless steel liner and fittings are offered in both Type 304 and Type 316L stainless steel. This liner system is intended for relining chimney's servicing wood, pellet, gas, oil, and coal applications and is backed by a limited lifetime warranty.

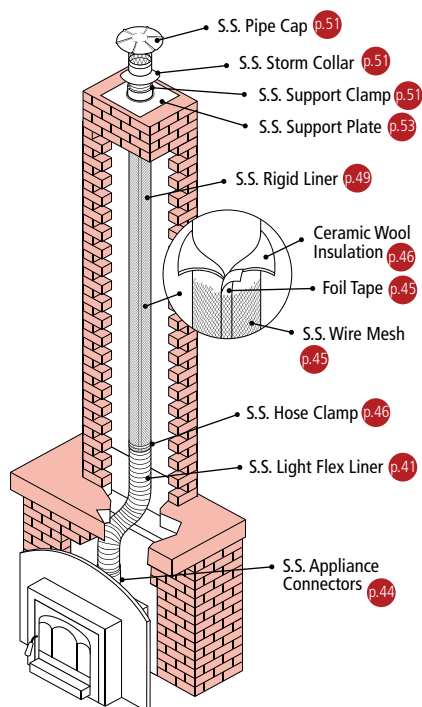

### Key Features

- 1 Continuous Laser Weld for Seamless Pipe and Superior Strength
- 2 24 gauge stainless steel for durability and performance .024 Thickness
- 3 Type 304 is used for wood, pellet, oil, category 1 gas installations.
- 4 1.5" overlap at each section
- 5 Type 316 Stainless Steel is used for coal
- 6 Limited Lifetime Warranty

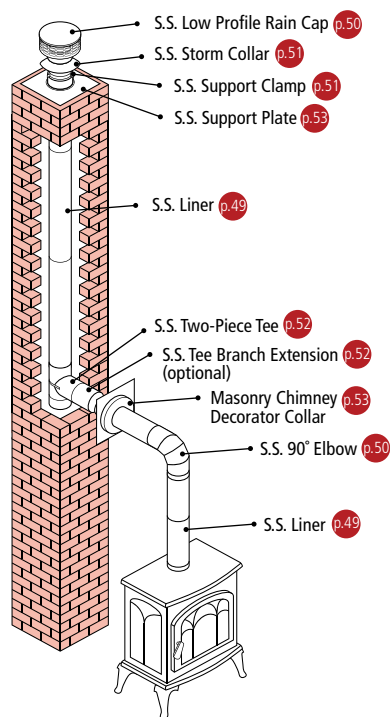

# Applications

## Wood Insert Masonry Chimney

## Wood Stove Masonry Chimney

# 24 Ga SS Rigid Liner

WOOD BURNING | 26 Ga SS Stove Pipe

# AIR-A-LATOR

## Air-A-Lator®

The Air-A-Lator® and the "Mason's Choice" are the number one outside air intake regulators for masonry fireplaces. The fire will burn warmer, cleaner and more safe because regulated outside air is used for combustion. The homeowner can control both the volume of air and direction of air with these unique products.

## Key Features

Exclusive Dual Damper System gives you complete control of combustion air. Other outside air intakes just let you control the volume of air. The Air-A-Lator® Dual Damper System gives you control not only of volume of air, but it also lets you control the direction of air. Both are necessary to produce the proper flames and control the rate of burning.

Helps stop backdraft smoking caused by negative pressure in the home.

Provides safety from dangerous carbon monoxide fumes. The use of an Air-A-Lator® in your fireplace helps prevent great amounts of air from being drawn out of your home. This reduces or eliminates the chance of drawing carbon monoxide fumes from household heating appliances — a growing problem as homes become more air-tight.

Less heat loss for more energy savings. Instead of drawing heated air from inside your home, Air-A-Lator® takes outside air and directs it right where it's needed.

Reduces pollution, ashes and customer complaints. When your fire burns more completely you'll have much less ash and smoke both in the air and in your home.

More heat per pound of fuel. Creosote, smoke, ash and unburned wood are all products of incomplete combustion. Because Air-A-Lator® provides the air needed for complete combustion, you can save dollars on fuel costs.

Meets building requirements. Many states now require a source of outside air. In many cases Air-A-Lator® is the only outside air intake regulator that meets these requirements.

## Slip In Air-A-Lator® for New Construction or Retrofit

| Type | Dimensions           | Order # | MSRP Price |
|------|----------------------|---------|------------|
| NH   | 13.5" x 4.5" x 2.75" | 220414  | \$228.18   |
| 1B   | 9" x 4.5" x 2.75"    | 220409  | \$190.97   |

Note: Type "NH" & "1B" for New Construction or Retrofit; Type "1B" is the size of one brick and has the same advanced qualities as type "NH" 18 gauge galvanized powder coated – black; 10 per case

# INSUL-FLUE

## Insul-Flue®

Patented USA #4,543,942 and CANADA #1,243,291

Insul Flue® provides security and protection for thru-the-wall stovepipe installations. Insul Flue® actually protects the wall on both sides when the chimney is not adjacent to the house wall. Insul Flue® reduces the minimum 18" clearance specified by NFPA standard to 2". This unique system can be used with both single wall and double wall connector pipe.

## Key Features

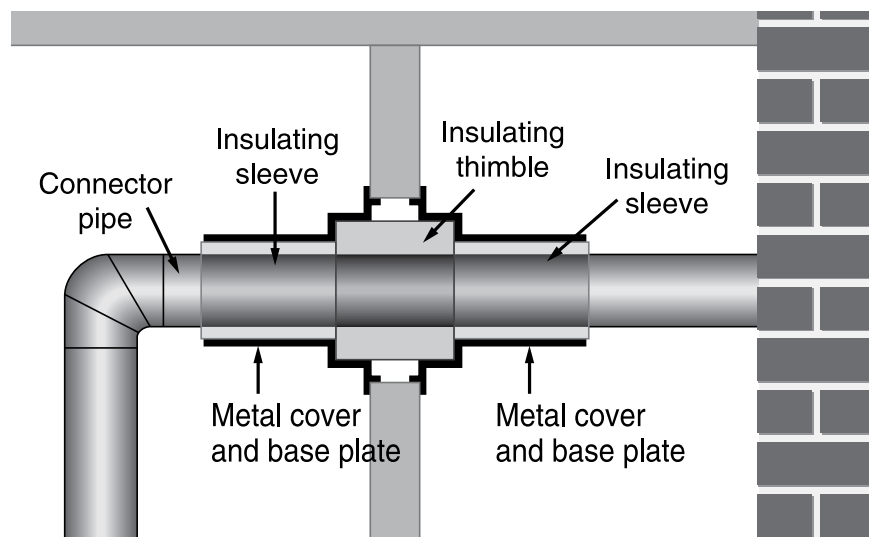

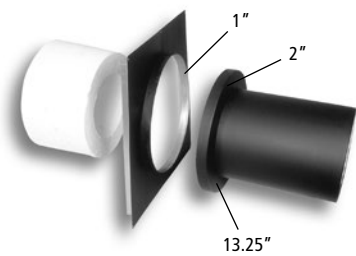

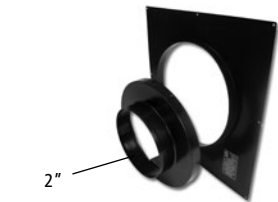

Illustration shows typical Thru-the-Wall installation. Insulating sleeves protect wall and any adjacent combustibles on both sides. Insulating thimble isolates wall itself – helps prevent overheating of wood bracing drywall, wallpaper, paint.

Thimble not included in wall units.  
Order separately.

# CHIM-A-LATOR

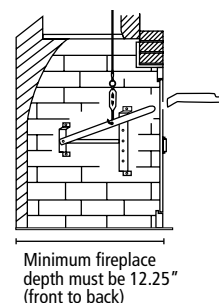

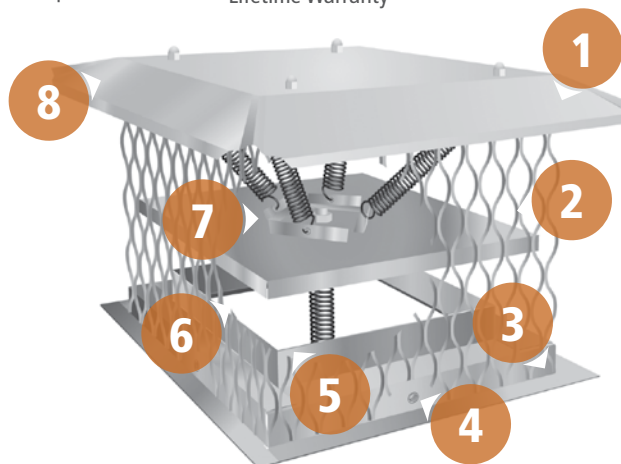

## Chim-A-Lator®

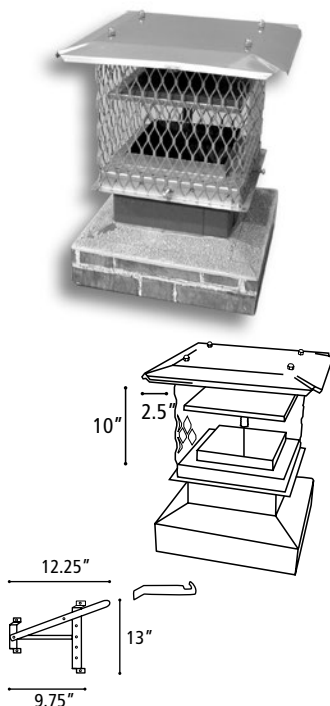

The Chim-A-Lator® Deluxe easily mounts on top of a masonry fireplace flue and is operated by a convenient, adjustable regulator installed on the side wall of the fireplace. It is far more efficient than conventional cast iron dampers and the ideal replacement for old defective dampers. Proven for over 40 years to be the most trouble free top sealing damper.

## Key Features

Safest Damper Design on the Market Designed not to close the flue in event of chimney fire. Keeps the fire and smoke in the chimney and out of the house. **Chim-A-Lator®** not for use with gas logs or appliances or air cooled factory built chimneys.

- 1 Fully Assembled Out of the Box** Provides for fast easy installation
- 2 Integrated Spark Arrestor** Provides for safe fireplace operation  
**Keeps Animals Out of the Chimney** even when damper is open
- 3 Heavy Duty Frame**
  - Made from 18 ga. stainless steel
  - Provides strength and rigidity
- 4 Threaded Weld Nuts** For easy and secure installation
- 5 Saves Energy** Tight seal on top of chimney, keeps heat in when fireplace is not in use
- 6 Damper opens a full 6.5"** Allows for maximum draft.  
**6 Setting Regulator** Controls the amount of draft to produce more heat when burning.
- 7 Won't Freeze Shut in Cold Climates** Heavy duty stainless steel springs provide 45lbs. of lift when opening damper.
- 8 100% Stainless Steel Construction** No rust or corrosion – Lifetime Warranty
